

More than just a GPS tracking system

Why did we even get into this?

Operating a car rental service in Brno, Czech Republic, with a fleet of over 70 vehicles, we initially developed our bespoke vehicle tracking server. This server not only enables remote engine deactivation for non-paying clients but also monitors the vehicles' technical conditions. Subsequently, our in-house solution has evolved into a comprehensive product for companies managing fleets.

Operation throughout the Europe and more

Belgium, Bulgaria, Croatia, Denmark, Estonia, Finland, France, Gibraltar, Guadeloupe, Guernsey, Ireland, Iceland, Italy, Jersey, Cyprus, Liechtenstein, Lithuania, Latvia, Luxembourg, Hungary, Malta, Isle of Man, Martinique, Mayotte, Monaco, Germany, Netherlands, Norway, Poland, Portugal, Austria, Greece, Reunion, Romania, San Marino, Slovakia, Slovenia, Spain, Saint Bartholomew, Saint Martin, Sweden, Vatican City, United Kingdom, Ukraine

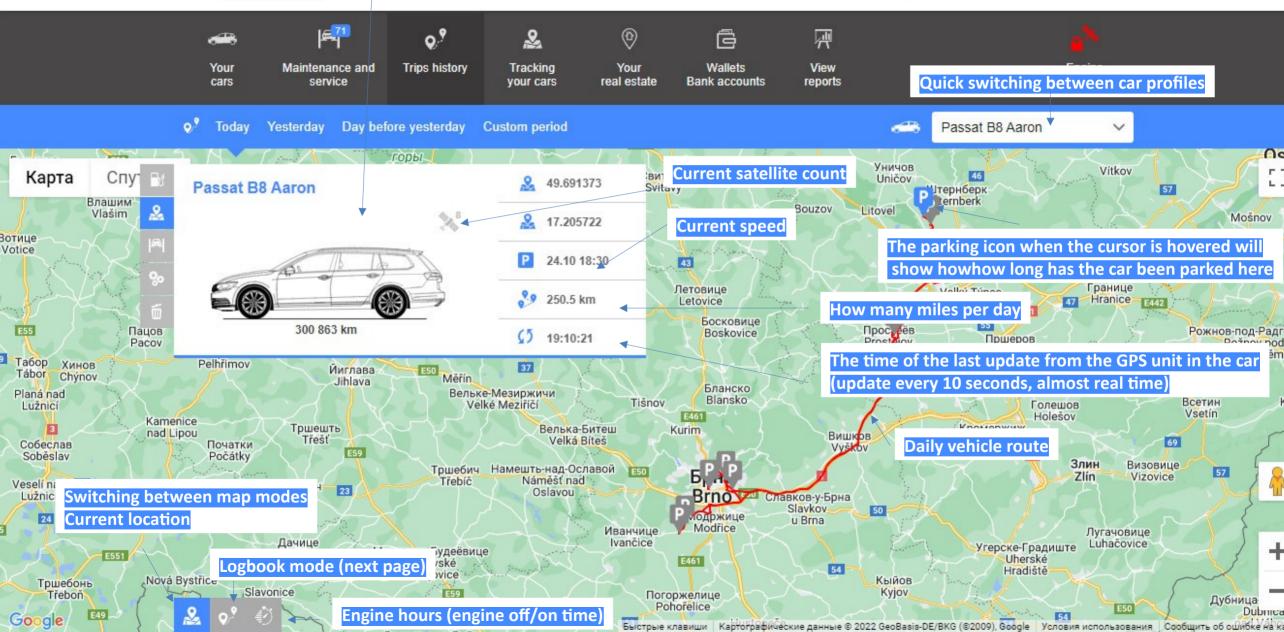

Clicking on a vehicle's icon reveals comprehensive details, including:

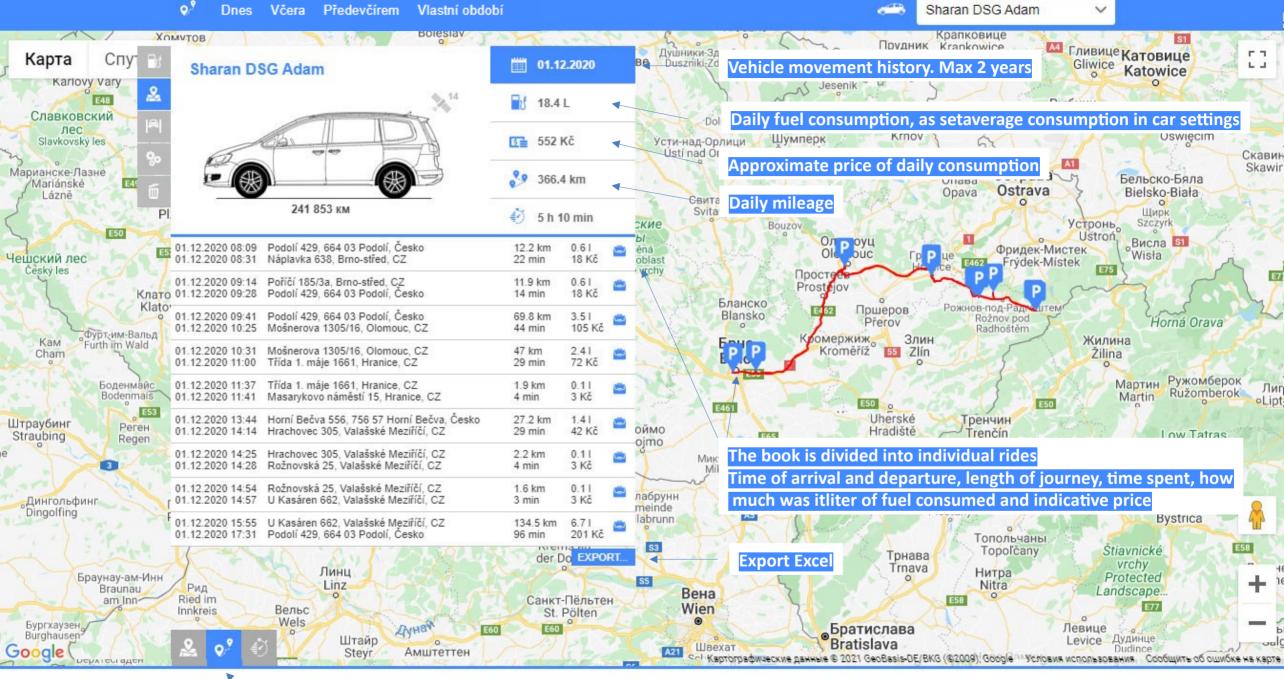

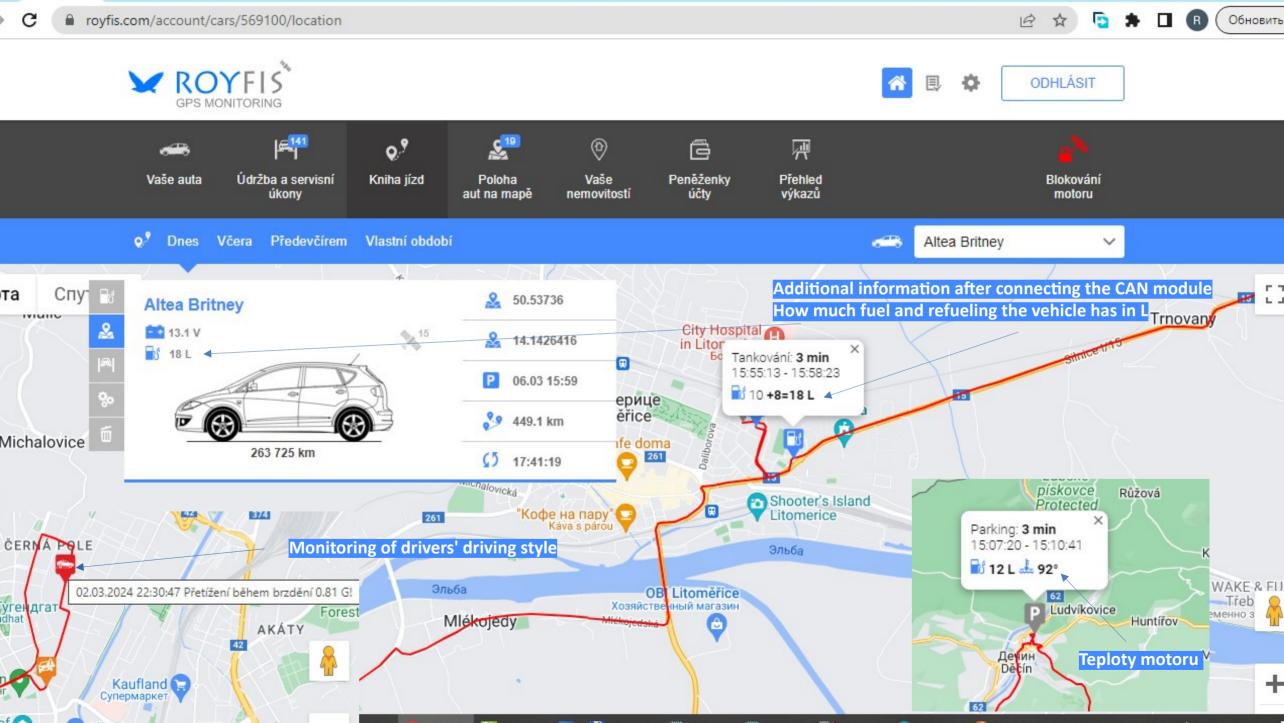

LOG OUT

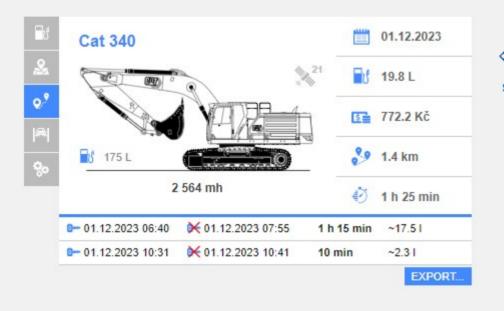

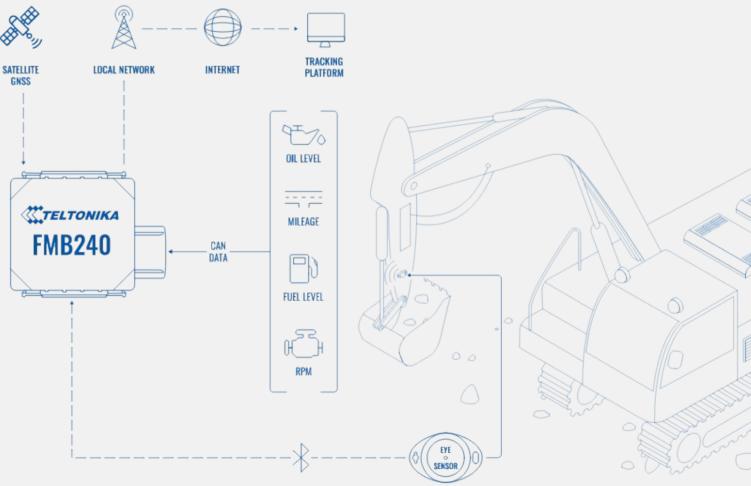

Track moto hours online

In addition, with the help of the EYE motion sensor for €50, it is possible to determine exactly whether the bucket of the construction equipment is in motion and whether it really being used or just idling.

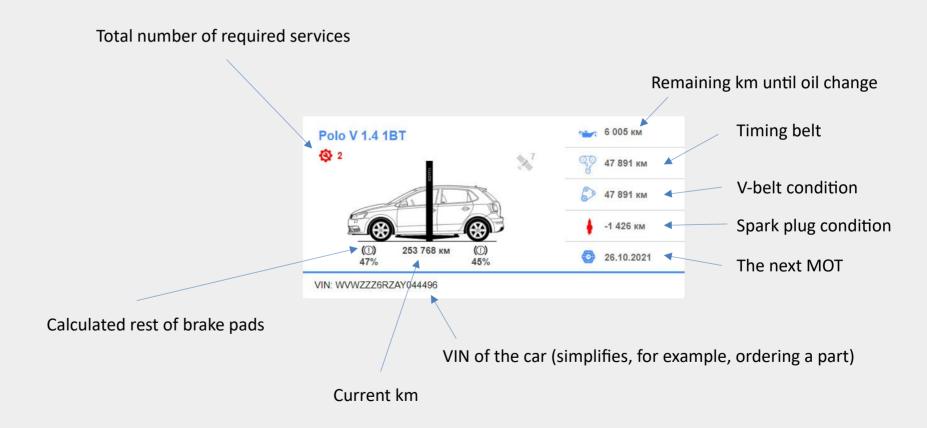

The system automatically calculates the distance traveled, so you have an overview of the current speedometer status.

Depending on the kilometers traveled or the time interval, the system will alert you to the necessary replacement:

Engine oil
Gear oil
Timing belt
V-belt
Car battery
Ignition/glow plugs
Fuel filter
Wipers
Brake pads
And so on...

In the system, we have a special police account, unc necessary (in cases of theft, suspicion of committing a according to your request, we share information vehicle.

System Stability?

Our own server developed from scratch (no boxed solutions unlike the competition).

Our server is written in the Erlang language, which can maintain connections with up to 1,000,000 devices simultaneously.

WhatsApp, Cisco, Ericsson, Amazon, and the English National Health Service (NHS), which handles 65 million requests daily, also chose Erlang for themselves, and the NHS has had an availability of 99.999% for over five years!

Pricing Structure

We are pleased to offer a starting tariff for our services at just 150 EUR per year, per vehicle. Depending on the range of functionalities you choose, this can go up to 350 EUR annually. For those looking for volume deals, we provide customized packages at special rates. Explore our offerings to find the perfect match for your fleet's needs.

Overview of devices and prices:

50€ - Basic Module

110€ - Module CAN

50€- Module cigaret

50€ -Waterproof module

180€ - Mobile module with double protection on battery (3 years stand alone operation)
